`toLowerCase()`

`toUpperCase()`

# String Methods

String Method	Description
trim()	Removes whitespace from both ends of a string
includes()	Checks whether a string contains the specified string/characters
substring()	Extracts the characters from a string, between two specified indices
match()	Searches a string for a match against a regular expression, and returns the matches
toLowerCase()	Converts a string to lowercase letters
toUpperCase()	Converts a string to uppercase letters
